Professional Summary

Computer Science graduate (B.Tech, AI & ML) with strong foundational knowledge in **AI/ML, software development** and **web technologies**. Hands-on experience in building ML solutions involving data collection, feature engineering, model training, validation, performance testing and web applications through academic projects and industry experience. Currently working as an Associate System Engineer at IBM, gaining exposure to Agile SDLC and enterprise applications, and eager to grow as a Software Engineer.

Education

GMR Institute of Technology, Rajam CGPA: 8.7 / 10
Bachelor of Technology — Computer Science (Artificial Intelligence & Machine Learning) *2021 – 2025*

Professional Experience

IBM | **Bengaluru, India** Dec 2025 – Present
Associate System Engineer

- Supported **Agile SDLC** workflows using **Jira** and **GitLab** — managing sprint planning, version control, issue tracking, and release cycles across enterprise application delivery.
- Executed functional and regression **testing** for enterprise applications and documented defects and collaborated with **cross functional teams** to accelerate resolution.

Awetecks Services Pvt Ltd | **Visakhapatnam, India (Startup)** Aug 2024 – Nov 2024
Full Stack Web Developer Intern

- Engineered end-to-end admin dashboard features for the Skills Uprise platform using **React.js** and **Node.js**, improving application performance by **17%** through offline-caching optimisations.
- Built **data transformation pipelines** using **Python**, **SQL**, and **Pandas** to analyse employee datasets, generate business insights, and support stakeholder reporting.
- Collaborated within a 6-member **cross-functional team** in an Agile sprint model; prepared **technical documentation**.

Key Projects

Heart Disease Prediction | *Python, Scikit-learn, Pandas, NumPy, Matplotlib* Github ↗

- Designed and executed a full **AI model delivery pipeline** — data collection, cleaning, **feature engineering**, EDA, model training, hyperparameter tuning, and **performance evaluation**.
- Trained and benchmarked Logistic Regression, Random Forest, and SVM classifiers; achieved **87% prediction accuracy** via `GridSearchCV`, monitored with F1-score, ROC-AUC, and cross-validation.
- Validated model behaviour on held-out test sets and documented performance metrics, assumptions, and deployment recommendations in structured **technical reports**.

Driver Drowsiness Detection | *Python, TensorFlow, OpenCV, YOLOv8* Read Paper ↗

- Developed a **real-time driver monitoring system** using computer vision and deep learning; managed the complete lifecycle from dataset curation and preprocessing through **model training, testing, and production validation**.
- Conducted **performance testing** and **troubleshooting** to reduce false-positive alert rates, improving detection reliability.
- Published research paper *"Image-Based Driver Drowsiness Detection using Machine Learning"* in **IJRAR Journal**; presented findings at **ICETS'25** international conference.

DOC4U: Your Personalized Doctor Appointment Hub | ***MERN Stack*** demo ↗

- Built a secure appointment booking platform with OTP-based email verification, Google login, and payment integration using Razorpay.Deployed application using Render, implemented real-time notifications with Node Mailer, modals and **toast** and optimized the MongoDB database for faster data transfer.

Technical Skills

Languages: Python, SQL, JavaScript

ML : Scikit-learn, TensorFlow, OpenCV, YOLOv8, Pandas, NumPy

Data Visualization: Matplotlib, Data Reporting, Dashboard Development

AI Lifecycle: Model Training & Validation, Performance Testing, Hyperparameter Tuning, EDA, Feature Engineering

Backend & Tools: Node.js, React.js, REST APIs, Git, GitLab, AWS Cloud, Jira

Practices: Agile / Scrum, SDLC, Cross-functional Collaboration

Certifications

Claude Certified Associate - Foundations | Anthropic

AWS Certified Cloud Practitioner | Amazon Web Services

Generative AI with Large Language Models (LLMs) | DeepLearning.AI (Coursera)

Joy of Computing using Python | NPTEL
